**-- The MAILING DATE of this c mmunication appears n the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Applicant is advised that should claim 1 be found allowable, claim 2 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 – 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Phillips (US 5,791,141).

With respect to claims 1 – 3, Phillips teaches a passive device for reducing noise in a hydraulic system (Fig.7) including at least one fluid conduit for carrying pressurized fluid (Fig.7, Item 150 or Fig.12B, Item 176), the device comprising a tubular element (Fig.7, Item 134 or Fig.12B, Item 172) having an open end (Fig.7, Item 146) and a closed end (Fig.7, Item 144), the open end of the tubular element adapted to be attached to the fluid conduit so that the tube fills with the pressurized fluid in

communication with the fluid in the system, and the area and length of the tube adapted so that the fluid within the tube has a resonant condition at a frequency that is the same as at least one frequency of the noise that is to be reduced in the hydraulic system (Figs.7, 12A and 12B; Col.11, Line 43 – Col.12, Line 32 and Col.14, Lines 6 - 63).

With respect to claim 3, the recitation that "*A helicopter having a main rotor system including an engine, a transmission, a main rotor, an airframe, and a hydraulic system of pressurized fluid for reducing the transfer of vibration from the main rotor system to the airframe*" has not been given patentable weight because it has been held that a preamble is denied the effect of a limitation where the claim following the preamble is a self-contained description of the structure not depending for completeness upon the introductory clause. *Kropa v. Robie*, 88 USPQ 478 (CCPA 1951).

### ***Conclusion***

3. The attached hereto PTO Form 892 lists prior art made of record that the Examiner considered it pertinent to applicant's disclosure.
